

CLIENT OUTCOMES

MAKING HEROES OUT OF CIO'S SINCE 2007.

Gartner

Named a 2017 “Vendor to Watch” and “Cool Vendor” by Gartner

DEVELOPMENT ROI

Our client outcomes prove our process and development platform reduces risk, enables future innovation, and increases return on investment over time.

Average outcome based on \$2M project.

RADD-IFYING YOUR **BIGGEST** CHALLENGE

Our RADD process stands for Rapid Alignment and Design & Development.

Rooted in the scientific method, our approach drives high-quality output and precise alignment with business and technology objectives.

We combine insight into your unique challenges (RA) with our engineering expertise (DD) and platform (XFORM) to execute outstanding solutions that meet your needs, ensuring strategic transformation quickly.

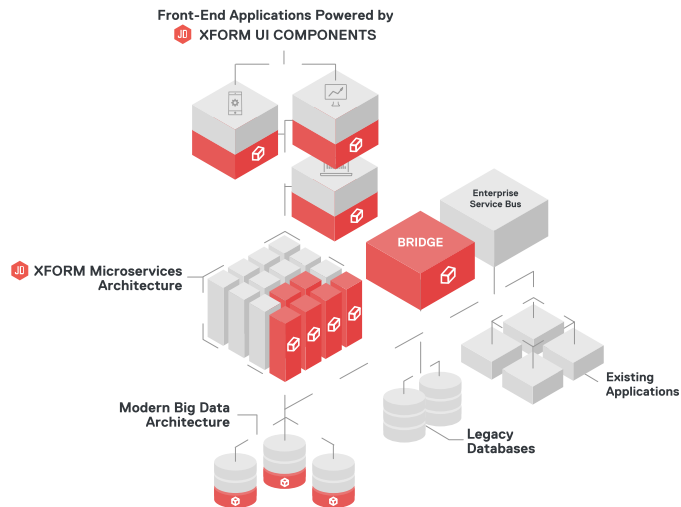

OUR XFORM TECHNOLOGY

By leveraging our proprietary platform, XFORM, your organization will benefit from solution creation that has a shortened foundational building period, and that rapidly connects to vital legacy systems. This translates into mitigated development risk and the enablement of future innovation.

XFORM FOUNDATION

All of the key components needed to establish a clean, scalable, secure, and flexible enterprise application.

XFORM BRIDGE

Enables seamless integration with existing enterprise assets to make integration initiatives effective.

BUILDING YOUR PROJECT WITH XFORM

BUILD 1

- Year 1: \$470,000 saved building on XFORM
- Years 2-5: \$680,000 saved in M&S

BUILD 2

- Year 2: \$535,000 saved with XFORM foundation in place
- Years 3-6: \$940,000 saved in M&S
- Year 6: Initial investment recouped +

CHANGING THE GAME FOR **MAINTENANCE & SUPPORT**

Creating technology to solve your business challenges shouldn't increase the need for maintenance and support. That's why we built XFORM, to not only accelerate initial development, but also to reduce cost over time.

Digital transformation doesn't happen with just one project. It's a suite of projects that bring about total business transformation.

The stability of the XFORM platform reduces M&S costs by a factor of two—freeing up budget for 2.0 features and net new initiatives.

INNOVATING **SUCCESS**

ACCELERATE **YOUR MVP**

- RADD process to validate solution approach to mitigate development risk
- XFORM foundational components enable you to standup in days, not months

CONTROL **MAINTENANCE COSTS**

- Small and independent components decrease fault risk
- Stability of the XFORM platform reduces overall M&S costs

ENABLE **FUTURE INNOVATION**

- Savings provides budget for successive builds and 2.0 features
- Microservices architecture ensures scalability
- Vendor neutral platform

LET'S MAKE YOU A **HERO**

We want to make you a hero by providing agile, inventive, and purposeful answers to the problems your business faces. There's no such thing as an unsolvable problem and we'll prove it.

GIVE US THREE HOURS TO SHOW YOU WHY YOU'LL
NEVER WORK WITH THE BIG FOUR AGAIN.
